

i-SAFE

e-Safety Education and Programming Implementation Strategy (Options)

The i-SAFE e-Safety curriculum is topically comprehensive and provides a unique approach to Internet safety education by meaningfully integrating the elements of current best practices in pedagogy and instructional design with pertinent e-Safety topics. This curricular design is further enhanced by the provision of flexible options to accommodate different classroom environments, lessons and activities targeting a variety of learning modalities to effectively reach all learners, and materials that can be integrated appropriately in a cross-curricular manner. Benefits of i-SAFE’s comprehensive instructional materials include, but are not limited to, the following:

- Approximately 240 lessons across all pre-primary through secondary grade levels
- Curricula can be scaffolded from year-to-year at each level
- Lessons offer more options with additional materials such as:
 - PowerPoint presentations
 - Related HTML activities
 - Video Webcasts
 - Corresponding teacher resource newsletters

Curriculum lessons cover e-Safety basics (e.g., personal safety and cyber citizenship) as well as current issues and trends (e.g., social networking, cyber harassment, mobile phone use, etc.). Each lesson stresses empowerment and enrichment opportunities with a full range of support materials to enable successful completion. For purposes of thematic/topical alignment, curriculum lessons have been arranged into the following “modules”:

<u>Code</u>	<u>MODULE</u>	<u>Available for ages (grades)</u>
CCC	Cyber Community Citizenship	Ages 5–17 (US grades K-12)
PSO	Personal Safety Online	Ages 5–17 (US grades K-12)
CS	Cyber Security	Ages 5–17 (US grades K-12)
CPI	Cyber Predator Identification	Ages 8–17 (US grades 3-12)
IP	Intellectual Property	Ages 8–17 (US grades 3-12)
DL	Digital Literacy	Ages 10–17 (US grades 5-12)
OER	Outreach, Empowerment, Review	Ages 10–17 (US grades 5-12)
ER	E-Rate (<i>has 3 sub-topic modules</i>):	Ages 5–17 (US grades K-12)

- AOB =** Appropriate Online Behavior
- CB =** Cyber Bullying
- SN =** Social Networking and Chat Rooms

The complete library of e-Safety curriculum lessons, including short lesson content descriptions, is presented in Schedule A of your Subscription & License Agreement. Schedule A is approximately 50 pages in size.

Because districts, schools, classrooms and students are unique and have different needs, the Implementation Strategy options (for each grade level) presented in this document are suggestions offered to help you design your own strategy/plan for implementing Internet

safety education. The suggested options are intended to permit you maximum flexibility in selecting both the subject matter and the number of e-Safety lessons that will be taught in each grade level. NOTE: In most cases, there are more e-Safety curriculum lessons available for each grade level than can be taught in any single academic period (i.e., quarter or semester or year). Therefore, district/school staff and faculty will need to work together to:

- 1) Choose the Implementation Strategy (i.e., “option”) that can be accomplished in any academic quarter or semester or year; and then
- 2) Select the specific e-Safety topic lessons that will be taught in each grade level.
